Sweden-headquartered BESS developer-operator Ingrid Capacity will build a 70MW/140MWh project in Finland, which it claimed will be the largest in the country.

This project could increase annual power production by 800 GWh and capacity by 650 MW. The total investment is estimated to be up to NOK7 billion to 8 billion, (US\$660 ...

This project could increase annual power production by 800 GWh and capacity by 650 MW. The total investment is estimated to be up ...

A report from BloombergNEF indicates global energy storage deployment is expected to exceed 300 gigawatts by 2030, reflecting a ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality ...

The project proponents have confirmed that the construction works will start in March 2025. The project, which is one of the largest of its kind in Finland, will provide grid ...

Vantaa Energy in Finland started the construction of the largest underground thermal energy storage in the world. It will have a volume of 1.1 million m³ and capacity of 90 GWh, ...

Hydro plans to build a new pumped storage power plant in Luster Municipality, Norway. With construction
