Are foldable containers effective in repositioning empty containers?

Foldable containers are considered an effective solution to deal with the endemic imbalance in the repositioning of empty containers. Several foldable containers were commercialized without clear breakthrough in the market and most current researches are still limited to small pilot projects.

How can a foldable container reduce the cost of storage?

The satisfaction of such conditions and the eventual adoption of the foldable container by the market would reduce the operation costs by 50% to 60%, the storage space in yard and depot by 80% and CO₂ emissions by 20% [8,12].

Are foldable containers economically viable?

In order to examine the economic viability of the developed foldable container as compared to a standard 40-ft high-cube container, cost analysis is performed for an example route, i.e., the Busan-Vostochny-Moscow route (Fig. 10), which involves both inland and maritime transportation.

Which containers are foldable or collapsible?

As mentioned above, the foldable or collapsible containers that have been actually commercialized to date are SIO, Fallpac and HCI. Among them, only HCI is fully foldable whereas SIO is collapsible and Fallpac combines collapsible and foldable features.

Investments in logistics infrastructure in Middle East and Africa are enabling greater use of FIBCs in domestic and international trade. Smaller enterprises are increasingly ...

This study seeks to explore the effectiveness of employing foldable containers (FLDs) in liner shipping to reduce relocation and the empty containers and bunker costs (BCs) ...

Foldable containers drastically reduce return trip costs by decreasing the volume of empty containers, translating into lower fuel use and fewer ...

Off-grid cost of foldable containers used in Middle Eastern ports

Key Companies
Key Coverage in The Foldable Container Market Report
The following section explains the demand for foldable containers in various countries. Chinese and Indian industries are experiencing intermediate growth in the upcoming decade, while Thailand and South Korea are progressing sluggishly in the foldable storage box market, with Spain having one of the lowest CAGRs among other nations. See more on future market insights
China: 4.6%
Spain: 2.1%
Countries: CAGR from 2024 to 2034
Thailand: 4.3%.
