OffGridBox is a project design and engineering company that provides renewable energy and clean water to remote communities around the world, with a focus on Energy for Health.

Powered only by solar energy, AMI Solar Reverse Osmosis and Ultrafiltration systems treat river water, well water, and seawater to produce water for ...

The off-grid and low-maintenance extraction of atmospheric water that can be supplied directly to plants can revolutionize irrigation in ...

Whether deployed as a standalone microgrid or part of a larger portfolio, our containerized systems ensure rapid installation, guaranteed reliability, and the resilience needed for extreme ...

HydroArk is a deployable water infrastructure system designed to deliver clean, drinkable water anywhere. It's modular, solar-powered, and fits inside a container or trailer-sized unit -- like a ...

In this guide, we'll explore how to harness solar-powered water pumps, filtration, and heating to ensure clean, drinkable water year-round --even in remote areas.

Powered only by solar energy, AMI Solar Reverse Osmosis and Ultrafiltration systems treat river water, well water, and seawater to produce water for drinking, irrigation, agriculture, and other ...

This self-contained unit not only removes contaminants and impurities but also operates independently of traditional power grids, making it a reliable source of potable water in even ...
