How can Palau reduce energy consumption?

The NEP set targets to reduce national energy consumption 30% by 2020 and produce a minimum of 20% of total energy from renewable sources by 2020.5 Palau initiated energy efficiency efforts to reduce government energy use through its Energy Conservation Strategy in 2007.

What is an uninterruptible power supply (UPS)?

Reviewed by Rebecca Piccoli on 7/17/2025. Uninterruptible Power Supplies (UPS) are critical devices that provide emergency power to a load when the input power source fails. These systems are essential for safeguarding sensitive electronic equipment from power disturbances, including outages, voltage sags, surges, and frequency variations.

How much solar energy does Palau have?

Palau currently boasts 600 kilowatts (kW) of grid-connected solar energy, as compared to a daily peak demand of 9-10 MW.⁸ The first 6.5-kW grid-connected solar project on the Public Works Department building was funded by Japan in 2008.

Where can I find uninterruptible power supplies (UPS) suppliers?
