What is a 5 MW solar power plant?

A 5 MW plant is a mid-scale installation, capable of producing enough power to support a large community or small town. Solar energy projects help in reducing dependency on fossil fuels and contribute to sustainable development. 2. Benefits of a Solar Power Plant Environmentally Friendly: Solar energy is clean and produces no greenhouse gases.

Why should you buy a 5MW solar power plant?

As you settle the entire cost of the 5MW solar power plant with your solar energy company, you become the owner of your solar plant and all the energy it generates. As a solar power owner, you benefit from the supply of free-of-cost, clean electricity for the next 25+ years.

Do solar batteries increase the cost of a 5MW solar power plant?

The inclusion of solar batteries increases the 5MW solar power plant cost, although the advantages still outweigh the cost. With the reliance on solar batteries, your business can thrive in remote locations where grid accessibility is costly or unavailable.

Can a 5MW solar power plant run a commercial establishment?

A 5MW solar power plant can run a commercial establishment independently from the Electricity grid. This size of solar farms takes up 24 to 25 acres of space and gives about 20000 kWh of low-cost electricity every day. Surplus power can subsequently be sold to the Electricity DISCOMs as per net metering mechanism of respective state government.
