---

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play ...

Imagine giving retired electric vehicle batteries a new purpose - that's exactly what second-life battery energy storage systems (BESS) are achieving in Podgorica.

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

EPCG said that the meeting also discussed the possibilities of investing in solar and wind power plant projects, improving the electricity grid, as well as developing new energy storage models, ...

Imagine giving retired electric vehicle batteries a new purpose - that's exactly what second-life battery energy storage systems (BESS) are achieving in Podgorica.

Explore how cutting-edge battery energy storage technology is transforming renewable energy adoption in Podgorica and why it matters for businesses and households alike.

As Montenegro accelerates its transition to renewable energy, the Podgorica New Energy Storage Demonstration Application serves as a critical testbed for scalable solutions.
