What does Performa Nova mean for Stora Enso?

With the launch of Performa Nova, Stora Enso expands its extensive portfolio of cartonboard products. In doing so, Stora Enso continues to lead innovation in renewable materials, providing customers with flexible supply options while advancing the transition to renewable, circular packaging solutions. Stora Enso

Why did Stora Enso launch Performa Nova?

The launch is a result of a major investment in fiber-based materials, reinforcing Stora Enso's long-term commitment to packaging sustainability and innovation. Performa Nova is produced using FiberLight Tec(TM), Stora Enso's extensively tested and proven proprietary technology that enables the creation of strong yet lightweight board.

What is Performa Nova?

Performa Nova is crafted using FiberLight Tec(TM), Stora Enso's rigorously tested and proven proprietary technology that facilitates the creation of robust yet lightweight board. This approach enhances material efficiency, allowing for the production of more packages with less raw material, all while maintaining packaging strength and visual appeal.

Could a five-in-one foldable container design boost efficiency?

A five-in-one foldable container design certified by the International Geneva-based International Standard Organization (ISO) could boost efficiency and transform the carriages of empties, claims Florida-based Compact Container Systems (CCS).
