-----

The plant for the production of lithium-ion cells and energy storage systems, the so called "Russian gigafactory", will be launched at the Baltic NPP site already in 2026.

The announcement follows the Russian military's seizure of Shevchenko, a village in Ukraine's eastern Donetsk Region that is home to one of the country's largest lithium deposits. Until ...

Russia is rapidly building gigafactories for lithium-ion battery production -- projects that rival the world's biggest players. From New Moscow to Neman, these plants will produce ...

Rosatom's Fuel division, managed by TVEL, has started pilot production of energy storage systems at the first Russian "gigafactory" built in the Neman district of Kaliningrad Region.

Rosatom's Fuel Division, managed by TVEL, has launched pilot production at Russia's first lithium-ion energy storage factory, "gigafactory" in the Kaliningrad Region.

The announcement follows the Russian military's seizure of Shevchenko, a village in Ukraine's eastern Donetsk Region that is home to one of the ...

This is the only large-scale industrial production of full-cycle lithium-ion batteries in the country, from primary chemistry for the battery cell to the creation of final modules and ...

Lithium is a critical mineral for EV batteries and renewable energy storage, with global demand surging as nations transition away ...
