PEB8038 half bridge modules contain two power semiconductors (Silicon Carbide MOSFETs) as well as gate drive and measurement circuits. They ...

Developed and produced in-house, this silicon carbide (SiC) inverter delivers highly efficient power usage. Its design is dedicated to commercial vehicle ...

Developed and produced in-house, this silicon carbide (SiC) inverter delivers highly efficient power usage. Its design is dedicated to commercial vehicle demands while benefiting from ...

It showcases the latest Infineon power module, setting a new market benchmark with outstanding performance. This easy-to-use kit is suitable ...

PEB8038 half bridge modules contain two power semiconductors (Silicon Carbide MOSFETs) as well as gate drive and measurement circuits. They enable engineers to rapidly implement ...

The Wolfspeed YM six-pack power module is durable and robust thanks to its advanced packaging technology. The YM module streamlines SiC integration into commercial, ...

CISSOID and Silicon Mobility have announced a far-reaching partnership to deliver a complete and modular Silicon Carbide (SiC) inverter reference design supporting electric motor drives ...

Our team is here to help with product inquiries and provide assistance. The CSL (Compact Silicon Carbide Line) power modules cover all major requirements of EV mass market.

These SiC modules operate within a -40°C to $+175^{\circ}\text{C}$ temperature range and come in AHPM-15 packages. The NVVR26A120M1WSx modules are automotive AQG324 compliant ...

It showcases the latest Infineon power module, setting a new market benchmark with outstanding performance. This easy-to-use kit is suitable for laboratory environments and can drive loads ...

CISSOID and Silicon Mobility have announced a far-reaching partnership to deliver a complete and modular Silicon Carbide (SiC) inverter reference ...

According to our latest research, the global Silicon Carbide Power Module for PV Inverters market size reached USD 1.42 billion in 2024. The market is experiencing robust expansion, ...
