We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid ...

Landowners can make money by leasing their land for a Battery Energy Storage System (BESS) project. It can require as little as 1 or 2 acres.

Flow batteries represent a versatile and sustainable solution for large-scale energy storage challenges. Their ability to store renewable energy efficiently, combined with their durability ...

This project will be Bhutan's first and largest grid-connected utility-scale solar power plant, marking a significant leap in the country's renewable energy ...

BESS energy storage in Thimphu isn't just about solving today's power challenges - it's building the foundation for a carbon-neutral economy. As Bhutan progresses toward its sustainability ...

The Thimphu Power Storage initiative, launched in 2023, aims to solve this through cutting-edge battery systems. But wait, isn't Bhutan already carbon-negative? that's exactly why this ...

This project will be Bhutan's first and largest grid-connected utility-scale solar power plant, marking a significant leap in the country's renewable energy ambitions.

What is the Timor-Leste solar power project?The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power ...

The project will be constructed in two phases, with the first phase investing Yuan 3 billion to install lithium
