Who are curtain walls?

At Curtain Walls, we provide exceptional curtain walling solutions across the UK. Our curtain wall manufacturers are experts in providing high-performance curtain wall systems, including both glass and aluminium installations. We cater to the architectural glazing needs of contemporary buildings and high-rise structures.

What is a curtain wall system?

Curtain walling systems are non-structural building components that are designed to provide an aesthetically pleasing exterior wall system. They are typically made of glass, aluminium, or a combination of both materials.

What Is Our Timeline for Curtain Wall Projects?

What is a photovoltaic curtain wall?

They enhance thermal comfort and help prevent the greenhouse effect. A standard curtain wall offers no return on investment. In contrast, a photovoltaic curtain wall not only insulates the building but also generates power for over 30 years. This reduces monthly electricity bills and ultimately pays for itself over time.

What is curtain walling?

Curtain walling is an exterior facade system that is attached to the structural frame of a building but does not bear any load from the building itself. It primarily serves to protect the interior from weather while allowing for expansive glazing, creating sleek, modern appearances with plenty of natural light.
