---

Solar glass is a type of glass that is specially designed to harness solar energy and convert it into electricity. It is made by incorporating photovoltaic cells into the glass, allowing it ...

Crafted with heat-treated safety glass, our photovoltaic glass provides the same thermal and sound insulation as traditional options, flooding spaces with natural light. Perfect for facades, ...

Pilkington Optiwhite(TM) is a range of extra clear low-iron float glass products with very high solar transmittance, offering improved solar energy conversion and consistent performances.

COOL-LITE(R) K is the range of single silver solar control glass. This product family offers a wide range of solutions to suit different needs and intentions, in terms of design and aesthetics, with ...

Solar glass, often known as solar control glass, is a specifically coated glass that limits heat entering the building. Glare is reduced thanks to the glass" ability to reflect and absorb the ...

Solar applications require flat glass. So-called Pattern Glass is mostly used as front glass in crystalline modules, whilst float glass is used for both substrate and back glass in thin-film ...

Solar photovoltaic glass differs from traditional solar panels primarily in its design and application. While traditional panels are ...

Solar photovoltaic glass differs from traditional solar panels primarily in its design and application. While traditional panels are generally mounted on rooftops or ground mount ...

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a ...

Solar glass, often known as solar control glass, is a specifically coated glass that limits heat entering the building. Glare is reduced thanks to the glass" ...

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not ...

K glass is a low-emissivity (Low-E) glass that has a special metal oxide coating applied to one of the internal surfaces of the insulating glass unit. This coating is almost invisible but plays a ...
