China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to ...

The Global Solar Power Tracker is a worldwide dataset of utility-scale solar photovoltaic and solar thermal facilities. It includes solar farm phases with capacities of 20 mega-watts (MW) or more ...

The Asia-Pacific region emerged as the largest market for solar PV in 2023, boasting a cumulative installed capacity of 893.67GW. Although a distant second and third ...

The continent has witnessed a significant uptick in solar power capacity in recent years, becoming the fastest-growing market globally. According to data from Global Energy ...

Asia is at the forefront of the global renewable energy boom, and it is the largest creator of green jobs. Find out top projects and market trends.

We spotlight the top 7 solar energy projects in the Asia-Pacific region that are making significant strides in harnessing solar power.

In an effort to show the strength of solar power in the region, we've compiled a list of the Top 50 largest Asian PV plants. This list of solar PV plants comes in preparation of the 2 ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's bright sunshine, cold ...

Abu Dhabi's Masdar has signed a power purchase agreement for a 200-megawatt floating solar photovoltaic project at Chereh Dam, Pahang, marking its first project in Malaysia ...
