---

AES Corporation has reached a significant milestone in advancing renewable energy with the completion of the first phase of the Bellefield Project, which is set to become ...

Its solar component can generate enough electricity to power over 65,000 homes annually, while the 300 MW / 1200 MWh storage component stores power for up to four hours each day. Our ...

Obtain a review of solar, storage, and other DER generation projects in New York State that received funding through NYSERDA. This dataset also includes detailed information each of ...

The project will be delivered in stages, with initial construction expected to begin in late 2026 and full buildout of solar and battery facilities planned for 2027 and 2028. Officials at ...

AES just completed the first half of Bellefield, which will become the largest solar + storage facility in the US. The 1,000-megawatt (MW) Bellefield 1 project in Kern County, ...

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is ...

Primergy, a renewable energy development platform launched by Quinbrook Infrastructure Partners, brought Gemini, a 690MWac/966MWdc solar PV plant paired with a ...

Sometimes energy storage is co-located with, or placed next to, a solar energy system, and sometimes the storage system stands alone, but in either configuration, it can help more ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of

capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW ...

From the UK to the UEA and USA to Australia, Energy Digital Magazine runs through 10 of the most impressive energy storage projects worldwide
