---

Chinese companies have in recent years built, or announced plans to build, Chile's longest power line, solar ...

Government officials have said they expect solar power will account for 46% of the country's total installed generation capacity by 2060, with most of that solar located in the ...

Ongoing investments in battery storage systems will also pave the way for new wind and solar plants. In Chile's north, Spanish company Grenergy Renovables is developing ...

Located in the Atacama Desert in northern Chile, this megaproject will have a total capacity of 2 GW of photovoltaic generation and 11 GWh of lithium-ion battery storage, ...

A notable example is the 1.2 GWh energy storage project co-developed by China's Sungrow and Chile's state-owned copper giant CODELCO. The system successfully reduced electricity ...

Solar and energy storage deployment is booming in Chile, spurred on by supportive government policy that has been markedly stable for 15 years. Indeed, the nation leads Latin ...

However, in recent years, Chile has been facing some serious issues: curtailment and marginal costs nearing zero. With solar project ...

Developed by UK-based ContourGlobal, the Quillagua plant is expected to become one of Chile's largest solar and storage projects once fully operational. The installation ...

However, in recent years, Chile has been facing some serious issues: curtailment and marginal costs nearing zero. With solar project owners needing to find a solution to make ...

With 23 energy storage projects already approved, totaling an impressive 3,000 MW of capacity, Chile is at the forefront of innovation and efficiency ...

Government officials have said they expect solar power will account for 46% of the country's total installed generation capacity by ...

Located on the edge of Chile's solar-rich Atacama Desert, the plant integrates 452,000 bifacial solar panels with 267 BYD MC Cube energy storage systems. At its core lies BYD's patented ...
