---

Let's face it--the energy transition is like a high-stakes relay race, and energy storage projects are the baton passing between China and Europe. With the global energy ...

Carbon Brief explores how China has been driving the energy storage sector forwards and how it fits into the nation's wider energy transition.

Carbon Brief explores how China has been driving the energy storage sector forwards and how it fits into the nation's wider energy ...

Enter local energy storage - the unsung hero bridging this mismatch. With a global market worth \$33 billion annually [1], energy storage systems are reshaping how China and ...

The cumulative installed capacity of new energy storage in China is expected to exceed 100 gigawatts (GW) by 2025, according to the Energy Storage Industry Research ...

In conclusion, solar power is playing a vital role in Ireland's energy transition, with several major solar farms currently under ...

Voltaia has been awarded an engineering, procurement and construction (EPC) contract by Orsted for its first solar power plant in Ireland, located ...

Wind and solar energy play a key role in Ireland's transition from fossil-fuel-based electricity generation. But these precious resources will need to be stored for times when the ...

In conclusion, solar power is playing a vital role in Ireland's energy transition, with several major solar farms currently under construction or completed. The use of battery ...

Solar panels used widely across Ireland, including in large solar farms, at airports, and on government buildings, were sourced from companies linked to forced labour and ...

Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power. Today, in May 2022, we have 13 projects operating with a ...

Voltalia has been awarded an engineering, procurement and construction (EPC) contract by Orsted for its first solar power plant in Ireland, located in County Carlow.
