Due to the fluctuating and intermittent characteristics of wind and solar power generation, the problems associated with integrating renewable energy and managing power system stability ...

Snowy 2.0 will link two existing dams - Tantangara and Talbingo - through 27km of tunnels and build a new underground power station. It has the capability to run for more than seven days ...

Most decentralized power systems in South Sudan are operated by private companies, NGOs and humanitarian organizations in South Sudan. In assessing the capacity of the off-grid electricity ...

You know, South Sudan's energy crisis isn't just inconvenient - it's literally holding back development. With only 7% of the population connected to grid electricity, most communities ...

To expand their energy storage projects, Energon opted for Socomec products to equip an electrical vehicle charging station with an energy storage system. Learn more about this ...

The initiative aims to update the energy sector diagnostics and analytics to inform the re-engagement in South Sudan's energy sector. Additionally, the programme will develop options ...

The 20 MW solar PV plant, located in Juba, the capital city, will have a 14 MWh battery energy storage system & will connect 16,000 households in the world's least electrified country.

There are plans to build new generation stations and to import electricity from neighboring Ethiopia, Sudan and Uganda, but the civil war has hindered progress in that direction.

In March 2020, South Sudan's installed generation capacity was reported as approximately 130 MW. Most of
