Does Sudan utilize solar energy?

Sudan is in the midst of energy transition after it lost its oil-rich south in a referendum in 2011. The country intends to contribute in combatting climate change affectsand Sudanis in the midst of energy transitionand has intended to contribute in combatting climate change affects,including the utilization of solar energy.

Should solar energy be adopted in The Sudan?

Theoretically,,technically,,and long term,there are huge potentials for solar energy adoption in The Sudan. The present transition phase requires a serious practical focused strategy to make positive contributions to its energy sector and development altogether.

Can solar power solve energy poverty in South Sudan?

Because South Sudan is still in the beginning stages of their infrastructural development, there is a rare opportunity to move forward and address the issue of energy poverty by building sustainable models of electrification, like solar power, without having to dismantle an already existing energy foundation.

How does South Sudan produce energy?

Most of the country's current energy production comes from generators that burn imported diesel,a costly method both economically and environmentally. According to the World Bank,only 8.4% of the population had reliable access to power and electricity in 2022,leaving the door wide open to produce much-needed renewable energy in South Sudan.
