How will Spain increase its energy storage capacity?

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems.

What is Spain's energy storage program?

For stakeholders in battery storage, thermal storage, and pumped hydro, this program offers not only financial backing but also long-term stability and political support. Spain has launched a EUR700 million energy storage program to support battery, thermal, and pumped hydro projects, aiming to deploy 2.5-3.5 GW of capacity.

Why do we need energy storage systems in Spain?

Energy storage systems in Spain are a key element in the fight against climate change, as they help us to address the challenge of the energy transition. These systems make renewable energy production more flexible; and therefore help us to guarantee its integration into the Spanish electricity system.

Will Spain start a new energy storage scheme?

The Ministry of the Environment of Spain has launched its latest financial support scheme for energy storage, aiming to kickstart 2.5-3.5 GW.

Spain's Instituto para la Diversificación y Ahorro de la Energía (IDAE) has issued a provisional funding proposal for the country's first call for innovative energy storage projects,...

The scheme, approved by the EU in March under its Temporary Crisis and Transition Framework (TCTF), is expected to ...

Successful applicants will receive up to 85% of their civil works, storage systems, auxiliary equipment, and system costs for grid ...

This year has been particularly active: 25 of these projects have seen developments in 2025, representing

1,335.62 MW moving forward with favourable ...

This initiative, coordinated by the Ministry for the Ecological Transition and the Demographic Challenge (MITECO), seeks to catalyze the deployment of between 2.5 GW and ...

Listed below are the five largest energy storage projects by capacity in Spain, according to GlobalData's power database. GlobalData uses proprietary data and analytics to ...

This initiative, coordinated by the Ministry for the Ecological Transition and the Demographic Challenge (MITECO), seeks to catalyze ...

"Achieving this level of development of renewable energy and storage projects in Catalonia by 2030 seems like a pipe dream," warns the consulting firm PwC in a report on the ...

Successful applicants will receive up to 85% of their civil works, storage systems, auxiliary equipment, and system costs for grid-connected battery, pumped hydro, and thermal ...

The scheme, approved by the EU in March under its Temporary Crisis and Transition Framework (TCTF), is expected to provide capex support to more than 100 projects ...
