Sukhumi capacitor energy storage equipment manufacturer

What makes EnCap a supercapacitor based energy storage system?
Our revolutionary supercapacitor-based energy storage technology represents a game-changing approach to power management. ENCAP is made up of Encapsulated Hybrid Graphene,Solid State and Tantalum Capacitor. Encapsulated Hybrid Graphene,Solid State and Tantalum Capacitor Max. Series connection

Are supercapacitors good for energy storage?
However,their energy density is typically lower than that of batteries,limiting their use for long-term energy storage. Our supercapacitors have been developed to meet the growing need for sustainable energy storage in wireless electronics.

What is EnCap based energy storage?
ENCAP is made up of Encapsulated Hybrid Graphene,Solid State and Tantalum Capacitor. Encapsulated Hybrid Graphene,Solid State and Tantalum Capacitor Max. Series connection An Emtel's super capacitor based energy storage can carry an impressive 500,000 cycles,surpassing regular batteries that typically manage only 6,000 life cycles.

Do EnCap super capacitor batteries degrade?
No degradationin the Encap super capacitor battery due to the full charging and discharge. Since no chemical process is taking place,the batteries do not degrade and last long. Successful track record of technology invention and commercialisation. Explore our product lines from 2018 to 2023 Have Questions?
