-----

In 2010 oil accounted for about a quarter of Syria's income, estimated as \$3.2bn for 2010, and almost all oil exports were to the EU. Production was 400,000 barrels per day (64,000 m<sup>3</sup>/d) in 2009 and exports about 150,000 barrels per day (24,000 m<sup>3</sup>/d), mainly Germany, Italy and France. According to BBC oil reserves were 2.5bn barrels in 2010. During the civil war before the fall of Assad the co...

The Assad regime's collapse last December and President Trump's May decision to lift U.S. sanctions spurred multiple foreign entities to express interest in not only exporting ...

The Assad regime's collapse last December and President Trump's May decision to lift U.S. sanctions spurred multiple foreign ...

As Syria's capital seeks reliable power solutions amidst growing energy demands, imported energy storage batteries have become critical infrastructure components.

In the third year of the Syrian civil war, the deputy economy minister Salman Hayan stated that Syria's two main oil refineries were operating at less than 10% capacity.

Summary: Explore how Syria is leveraging solar power generation and energy storage systems to overcome electricity shortages, reduce reliance on fossil fuels, and build climate-resilient ...

Syria's power crisis is unlikely to be resolved through grid repair alone. For millions of Syrians, renewable energy combined with battery storage ...

In the heart of the Middle East, Syria is quietly making waves with its groundbreaking energy storage project - a \$120 million initiative aiming to stabilize the national grid while integrating ...
