How much does a solar roof cost?

“Tesla's Solar Roof is possibly the sleekest solar solution out there,” CNET's AJ Dellinger wrote. The price of more common solar panels can vary due to a variety of factors. CNET estimates it at between \$15,000 and \$20,000 for a 5-kilowatt system. That's on the low end of MarketWatch's 6-to-8-kilowatt estimate for what the average home needs.

How much does it cost to install solar panels?

While solar offers a great return on investment, it is a large ticket purchase that will require you to either have access to large sums of cash, or the ability to secure financing. \$30,000 depending on how many panels you require, while a heavy power consumer may spend upwards of \$50,000 for a larger installation.

What is a good price per watt for rooftop solar?

A good price per watt for rooftop solar provides a balance of savings potential and robust warranty and service coverage. Based on recent solar pricing trends from the SEIA, this balance can be found in the \$3-4 per watt range for residential solar projects.
