---

We have seen cases of the glass in solar panels (photovoltaic [PV] modules) breaking differently, and more often, than it did 5 years ago. There have been many changes to PV module design ...

Dual-glass PV modules are experiencing low-energy glass fracture under expected conditions of use at an alarming rate. David Devir of VDE Americas looks at the ...

Despite ROSI's success in the area, Luxchemtech's Palitzsch warned that the presence of antimony in most solar glass is still a problem ...

Despite ROSI's success in the area, Luxchemtech's Palitzsch warned that the presence of antimony in most solar glass is still a problem when it comes to recycling.

As solar glass and advanced batteries add new demand on top of existing uses, any supply disruption--such as China's recent export controls and bans--reverberates ...

"What we're hearing is a lot of solar projects are having difficulty with expensive insurance policies and that's to do with hail ...

The solar PV glass market size crossed USD 53.5 billion in 2024 and is estimated to grow at a CAGR of 7.9% from 2025 to 2034, driven by the significant increase in solar installations due ...

With PV module capacity ramping up, glass suppliers have been investing in new solar glass production capacity. As in India and ...

A decrease in the average selling price (ASP), along with the impairment provisions for certain solar glass production facilities and inventory write-downs, are the major reasons for ...

Yes, the sixth annual PV Module Index Report from RETC had some troubling findings, headlined by reports that spontaneous ...

Dual-glass PV modules are experiencing low-energy glass fracture under expected conditions of use at an alarming rate. David Devir ...

With PV module capacity ramping up, glass suppliers have been investing in new solar glass production capacity. As in India and China, new facilities are popping up in North ...
