While inheriting the artistic texture of glazed tiles, the curved solar tiles are designed to meet the needs of different users and are suitable for different styles of buildings.

Jackery's XBC curved shingles promise near 25% cell conversion efficiency, exceeding traditional solar panels and other solar roofs. Modular design allows for easier ...

Compared to conventional solar panel, curved crystalline silicon PV tiles are designed to preserve the curves and aesthetics of traditional building roofs while achieving ...

Its curved-tile form restores architectural beauty while boosting installation efficiency per unit area by 5%, delivering a pleasing fusion of function and form. This first-of-its-kind tile from Jackery ...

Curved surfaces facilitate better sunlight absorption at varying angles, enhancing performance throughout the day. This design exploits ...

Compared to conventional solar panel, curved crystalline silicon PV tiles are designed to preserve the curves and aesthetics of ...

Solar roof tiles, integrated with 4mm thick double tempered glass and processed according to EN50583 standard, can withstand storms and hail, low voltage and double glass structure to ...

While inheriting the artistic texture of glazed tiles, the curved solar tiles are designed to meet the needs of different users and are suitable for different ...

Our solar roof tiles meet all safety requirements, are not only flexible, but also have double insulation and high UV resistance, and are suitable for outdoor applications.

Jackery"s XBC curved shingles promise near 25% cell ...

Curved surfaces facilitate better sunlight absorption at varying angles, enhancing performance throughout the day. This design exploits the natural path of the sun, leading to ...

At CES 2025, Jackery has launched an innovation that could change the face of our homes, winning over even the most sceptical: XBC curved solar tiles.
