-----

The Digital ProcessPower(R) (DPP) UPS from AMETEK Solidstate Controls is a true on-line, double conversion Uninterruptible Power Supply system that provides continuous, clean, ...

When looking at the process with "ps ax" the stat column is "DI" which means "uninterruptible sleep (usually IO)". Is it possible to find out more details on what the process is ...

An uninterruptible process is a process which happens to be in a system call (kernel function) that cannot be interrupted by a signal. To understand what that means, you need to understand ...

With the second transmission line forming a loop, it is now easier to maintain power supply through alternative routes in case of trouble. Along with the two substations in ...

As you could read from that answer, setting the current process state to TASK\_UNINTERRUPTIBLE is needed for make schedule() call, performed by that thread, to ...

Yes, you must call set\_current\_state() before calling schedule(), because otherwise the scheduler will not remove the task from the run queue (if you just want to ...

The company specializes in uninterruptible power supply systems that are tailored to meet the specific needs of various applications. Whether for data centers, healthcare facilities, or ...

The man page says what the state codes are mapped to, but not what they actually mean. From the top man page: "D" = uninterruptible sleep "R" = running "S" = sleeping ...

I have a VirtualBox process hanging around which I tried to kill (KILL/ABORT) but without success. The
