How do I install solar panels in New York City?

In order to install solar panels in New York City, Urbanstrong's solar team will need to obtain permits from the Department of Buildings and the utility company, but the process is generally straightforward and we take care of everything for you. Can I sell excess solar energy back to the grid in New York City?

Can rooftop solar make money?

Absolutely. The Urbanstrong team has dozens of clients all across the city who have invested in rooftop solar and now enjoy a steady stream of passive income. It's like this: solar photovoltaic (PV) panels catch sunlight falling from the sky and turn it into money.

How much power does a solar panel produce per square foot?

The more efficient a solar panel is, the more power per square foot. As of 2025, the most popular solar panels have a rated output of 450 watts. To get the most out of your solar energy system, choose panels with at least that much power output. Your solar inverter setup is also an important consideration--make sure it suits your roof's layout.

How long do solar panels last in New York City?

However, many solar panel systems in the city have a payback period of around 6-8 years for brownstones and 3-5 years for coops and condos, after which the energy savings can be significant. What permits are required for solar panel installation in New York City?

China unveils results after replacing solar panels with transparent photovoltaic windows, achieving up to 75% lower energy use and still generating clean power.
