Vanadium, symbol V and atomic number 23, is a silvery-gray metal found primarily in nature in ores such as vanadinite and patronite. It has been an essential component in various ...

vanadium (V), chemical element, silvery white soft metal of Group 5 (Vb) of the periodic table. It is alloyed with steel and iron for high-speed tool steel, high-strength low-alloy ...

The annual meeting of the Southern Baptist Convention voted to affirm a decision made earlier this year to remove Saddleback Church, a major southern California ...

Rick and Kay Warren talk to CNN's Piers Morgan about the day they found out their son Matthew had committed suicide.

Vanadium is a chemical element with the atomic number 23 and the symbol "V." It is a soft, silvery-gray, ductile transition metal. The element is primarily used in various high-strength ...

Vanadium is a chemical element; it has symbol V and atomic number 23. It is a hard, silvery-grey, malleable transition metal. The elemental metal is rarely found in nature, but once isolated ...

Rick and Kay Warren had their first media interview since their son Matthew's death with CNN's Piers Morgan, with whom they discussed depression, raising a mentally ill child, guns, grief, ...

Pure vanadium is a bright white metal, and is soft and ductile. It has good corrosion resistance to alkalis, sulfuric and hydrochloric acid, and salt water, but the metal oxidizes readily above 660°C.

Vanadium is found in about 65 different minerals including vanadinite, carnotite and patronite. It is also found
