Do I need a solar inverter in Victoria?

Solar and battery inverters in Victoria and all Eastern Australia must be installed with AS/NZS 4777.2:2020 Australia A settings. It is your legal obligation to be aware of and to comply with these new requirements.

How do I configure solar PV & battery inverter settings in Victoria?

To correctly configure solar PV and/or battery inverter settings in Victoria, simply: Select your country/region. Some manufacturers may have this pre-selected. Select the AS/NZS 4777.2:2020 Australia A setting. The naming of zones may differ between manufacturers but may appear as:

Should I upgrade to a higher-capacity solar inverter?

Upgrade to a higher-capacity inverter if needed. Installing a solar power system doesn't have to be complicated. By following this guide, you'll have all the knowledge you need to set up a reliable and efficient solar inverter system, from mounting roof panels to wiring batteries.

How to install an inverter?

For best operating results, the inverter should be mounted on a flat surface. Mount as close as possible to the batteries. Try and keep the distance between the product and the battery to a minimum in order to minimize cable voltage losses. There should be a clear space of at least 10cm around the appliance for cooling.

AS/NZS 4777.1 Update: Discover the latest inverter rules, safety upgrades & what they mean for solar, V2G & battery systems in 2024 and beyond.
