Can solar and wind power meet Vietnam's near-term energy needs?

Contrastingly, solar and wind power's lower capital requirements and faster development timelines are well-suited to meeting Vietnam's near-term energy needs. These projects can be implemented within months and with high certainty, unlike gas projects, which typically take four to five years to complete once financed.

Is subsidy reshaping Vietnam's Electricity sector?

The rapid, subsidy-driven expansion has exposed gaps in planning and financial sustainability - laying the groundwork that is now reshaping the sector's trajectory. The state utility Vietnam Electricity (EVN) is now under financial strain due to the tariffs it set, which were as high as USD9.35 cents per kilowatt hour (¢/kWh).

Could Vietnam replace fixed feed-in tariffs with standardized auctions?

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the lowest cost.

With global costs for solar, wind, and battery storage systems continuing to fall, Vietnam could replace fixed FiTs with transparent auctions, enabling clean energy ...

After research, the Joint Venture proposed to invest in a project to produce electricity storage batteries for industrial and civil use with an expected design capacity of 5 ...

Whether you're a homeowner in Hanoi, a solar EPC in Ho Chi Minh City, or a telecom integrator in the Central Highlands, GSL ENERGY has a storage solution for you.

A consortium of five Vietnamese and international companies has proposed a major investment in an energy storage battery manufacturing facility in Ho Chi Minh City's Saigon ...

One of the first DPPAs to be signed in Vietnam and covers an integrated rooftop solar and battery energy
