TotalEnergies and Canadian Solar are boosting the future of energy storage in Europe with major projects in Germany and the UK. As the European Union accelerates its ...

Lithium, cobalt, graphite, copper and nickel remain instrumental to the lithium-ion batteries used in EVs and utility-scale energy storage systems (ESS), the latter of which enables grids stability ...

In March 2025 we announced five new battery storage projects with a total capacity of 221 MWh in the following cities: These projects, piloted by Kyon Energy - acquired by TotalEnergies in ...

Our sites are equipped with lithium-ion battery containers designed and assembled by Saft, delivering some of the best energy performance on the market in terms of ...

In the years ahead, storage will play a decisive role in making Europe's energy system more resilient, flexible, and ultimately more ...

The EU is advancing several key projects and initiatives in the energy storage field to boost renewable energy integration, stabilize the grid, and support clean energy goals.

TotalEnergies and Canadian Solar are boosting the future of energy storage in Europe with major projects in Germany and the UK. As ...

If we apply the same focus and ambition to storage that we once did to solar, Europe can build a resilient, renewables-based energy system faster than many think.

The obvious answer to this conundrum is utility-scale Battery Energy Storage Systems (or BESS), capable of
