-----  
How much energy does Slovakia use?

Primary energy use in Slovakia was 194 TWh and 36 TWh per million inhabitants in 2009. Slovakia has a plan to get renewable sources of energy up to 19.2% by 2030. From 2024, following the completion of two new nuclear reactors, Slovakia will return to being a net exporter of electricity. Slovnaft is the largest oil refinery in Slovakia.

What is the share of RES-E in Slovakia's electricity generation?

As of the end of 2024, the share of RES-E in Slovakia's electricity generation increased by a percentage point compared to the previous year, reaching 24.2%. Hydropower continues to lead, comprising 66% of the total installed renewable capacity, followed by solar PV at 29% and bioenergy at 5%.

Does Slovakia still lead in sustainable electricity generation?

The historical patterns underline the importance of consistent investment and development in low-carbon technologies, ensuring Slovakia continues to lead in sustainable electricity generation. Slovakia's electricity mix includes 67% Nuclear, 11% Hydropower and 11% Gas. Low-carbon generation peaked in 2002.

How many solar PV plants are there in Slovakia?

There are currently 479 utility-scale ground-mounted solar PV plants with almost 586 MW of installed capacity and 528 MW of rooftop PV systems in Slovakia. The largest solar PV plant to-date was commissioned in 2024 in the municipality of Iliasovce (Kosice Region) with installed power at 6.3 MW.

While global markets use standard NMC cells, Slovak projects like the Bratislava Energy Hub employ nickel-rich cathodes (NMC 811) specifically engineered for -20°C operation.

primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end

Slovakia's electricity mix includes 67% Nuclear, 12% Hydropower and 10% Gas. Low-carbon generation peaked in 2002.

This Outlook analyses the five key renewable electricity sources, namely solar PV, onshore wind, hydropower, bioenergy, and geothermal, along with, for the first time, battery energy storage ...

As of 2022, Slovakia registered about 217 small-scale hydropower plants up to 10 MW with a total installed capacity of 81.6 MW. Sources: EU Commission Energy Statistics of the EU-27 ...

In Slovakia, nuclear power plants still hold the lead in electricity generation, producing 60.11% of all electricity last year. This ...

Why is pumped storage important in Slovakia? Coupled with pumped storage technologies, this popular source in Slovakia is regarded as the key to lower disruptions in the national ...

Renewable energy includes wind, solar, biomass and geothermal energy sources. At the end of 2022, wind power capacity in Slovakia constituted 3 MW, a number that has not changed ...

In Slovakia, nuclear power plants still hold the lead in electricity generation, producing 60.11% of all electricity last year. This was followed by hydropower plants with 15%, ...

Ample natural gas storage levels, strong efforts to reduce energy consumption, and accelerated electrification initiatives helped the Visegrad region (the Czech Republic, Hungary, Poland and ...

From 2024, following the completion of two new nuclear reactors, Slovakia will return to being a net exporter of electricity. Slovnaft is the largest oil refinery in Slovakia. In 2022 Slovakia sought to reduce its reliance on oil from Russia. Slovensky plynarensky priemysel (Slovak Gas Industry, SPP) is the main natural gas supplier in ...

Energy production includes any fossil fuels drilled and mined, which can be burned to produce electricity or used as fuels, as well as energy produced ...
