It also encourages interdisciplinary research between mechanics and materials, physics, and chemistry, which is referred to as X-mechanics.

Materials Materials is an international peer-reviewed, open access journal on materials science and engineering published semimonthly online by MDPI.

The "Smart Materials" section is a forum for the rapid publication of works pertaining to the preparation, characterization, and application of all smart materials.

The Section covers all aspects of the green materials field, welcoming papers spanning all phases of material life, from the synthesis, processing, and characterization to testing.

Materials publishes Special Issues to create collections of papers on specific topics, with the aim of building a community of authors and readers to discuss the latest research and develop ...

It covers all aspects of materials science and engineering including synthesis, structure, mechanical, chemical, electronic, magnetic, and optical properties, as well as their various ...

Some topics of interest are: Scientific developments in construction and building materials; Fundamental, theoretical, modelling and experimental studies of materials; Energy, ...

The Section, "Carbon Materials", will serve as a guide for the study of carbon-based materials and promote further research, leading to significant progress in this area.

The "Materials Physics" section provides a forum for the rapid publication of original works that significantly
